**Subject:** RE: Current noncancer hazard language?

The 4 "descriptors got pulled into the annotated template (at least for the time being). Here they are:

## Ex. 5 Deliberative Process (DP)

I should have pulled them out before now, but lost track of where they were as a set!  
Sue

Thanks Sue. Here are the example descriptors I pulled out: (my questions in red)

## Ex. 5 Deliberative Process (DP)

I can send you the current draft of RDX....

Sue-This is good to know that these discussions are taking place. Anyone know offhand the descriptor categories used for RDX/ETBE/TBA? I am assuming they are a bit different than BaP.

I am also looking forward to hearing what came out of this latest LEAN effort...

Interestingly, that was discussed at some length during the past 3-day LEAN-related "retreat" on annotating the template. I understand that the STP (? Science and technology policy group?) will be reviewing this framework for descriptors in Dec (at the Agency level). (I think I got that approximately correct). Until then, things are pretty much up in the air.

## Ex. 5 Deliberative Process (DP)

But that could all change (as always)!

**Subject:** Current noncancer hazard language?

Hi Sue and April:

Does anyone know what the current noncancer hazard categories are? The most recent version that I have of the draft handbook (it was included as part of the lean materials) has the categories for human or animal data as:

Ex. 5 Deliberative Process (DP)

## Ex. 5 Deliberative Process (DP)

#### Ex. 5 Deliberative Process (DP)

So I am not sure how the program is moving

forward. I can try to follow up with Samantha before our meeting to discuss the hazard calls and D-R modeling...unless anyone has the recent scoop on this.
